

GRANITE ROCKS EARTH DAY

With Earth Day coming up **tomorrow**, we've gone green by recycling a photo of Granite Properties CEO **Michael Dardick** (who's clearly very excited about saving the Earth) with colleague **Brooke Sigler** during last year's event. COO **Greg Fuller** says the firm is committed to building energy-efficient properties and pulls out his list of examples: at the top, earning **LEED Gold** for 17Seventeen, the **first high-rise in Dallas** to make the grade; beyond that, the company has landed numerous BOMA 360 Performance Building Awards across the portfolio.
